

Step By Step Instructions

1. Check if you are a WAMP or MAMP user, if you are a MAMP user , you need to go to <app/php/ConnectionManager.php> and change the password to 'root'.
2. Check what is your Port Number , it is either 3306 or 3308 and change the port number on <app/ProjectWebsite/php/ConnectionManager.php> accordingly
3. Take the content in user.sql and paste it in your phpMyAdmin to create the database
4. To start using our application, go to <http://localhost/app/loginpage.php>
5. Create your account by clicking on the registration button and filling up your details.
6. After Successful registration, log in to the webpage using the credentials you have provided
7. Upon successful logging in, you will be brought to the <http://localhost/app/search.php> page where you can start searching for the destination of your interest.
 - a. When you finish typing your destination, you can press enter button to submit or click on the "Find me a parking space" button
8. Now you will be brought to the <http://localhost/app/information.php>
9. Looking at the map, you can see that there are many popups with the number of available lots displayed in the pop-up . Each popup represents a carpark and you can click on it.
10. Upon clicking on it, the carpark details will pop up. In here you will be able to see the more in-depth detail of the carpark. You will be able to see the **carpark rates, distance and time taken to walk from the carpark to desired destination.**
11. Clicking on the "Get Directions Here" will bring you to google maps where the origin and destination have been pre-filled.
12. Your search history will be displayed in the search page together with your favorites location. At the search history portion , your previous **5** searches will be displayed. You can favorite the location in the search history for easier ease of access to the location.
